COM1205 – Photography - Introduction Portfolio

Your portfolio should be examples of your best work. These can be photos you have taken outside of class or from another course, but they can NOT have already been submitted in this module. Any photo that has already been submitted for this module will receive a zero. Your portfolio will be graded using the same criteria as your projects.

You will choose 15 of your best photos and print them out in color. You will then mount these photos to a piece of poster board as neatly as possible. Your poster board must also include the module number (COM1205 in this case). Once the photos and are mounted to your satisfaction, turn in your portfolio and a Photography Project Marking Guide for marking.
